

# Pedestrians please take care

In the last five years there were 23 fatalities involving pedestrians on level crossings. So please take care and be aware.

**It's easy to get distracted**, especially by phones and music. If you're in a group don't assume that someone else is looking out for you. **Remove headphones and concentrate**

It can be tempting to run over the crossing rather than wait for a train to pass. Don't do it – you're putting lives at risk. **Stop, look and listen.**  
**Follow signs and instructions.**

**Don't assume** there is only one train or use previous experience to guess when the train is coming. Trains can come from either direction at any time. **Check both ways before crossing – if there is a train coming, don't cross.**

Network Rail cares about your safety. That's why we're investing £100 million to make level crossings safer. To find out more, go to [networkrail.co.uk/levelcrossings](http://networkrail.co.uk/levelcrossings)
